

One history,
a thousand
inspiring
stories.

Skylodge Adventure Suites

Concept and design

Vertical Housing Modules

12 people
per nights

4 beds

Folding
Tables

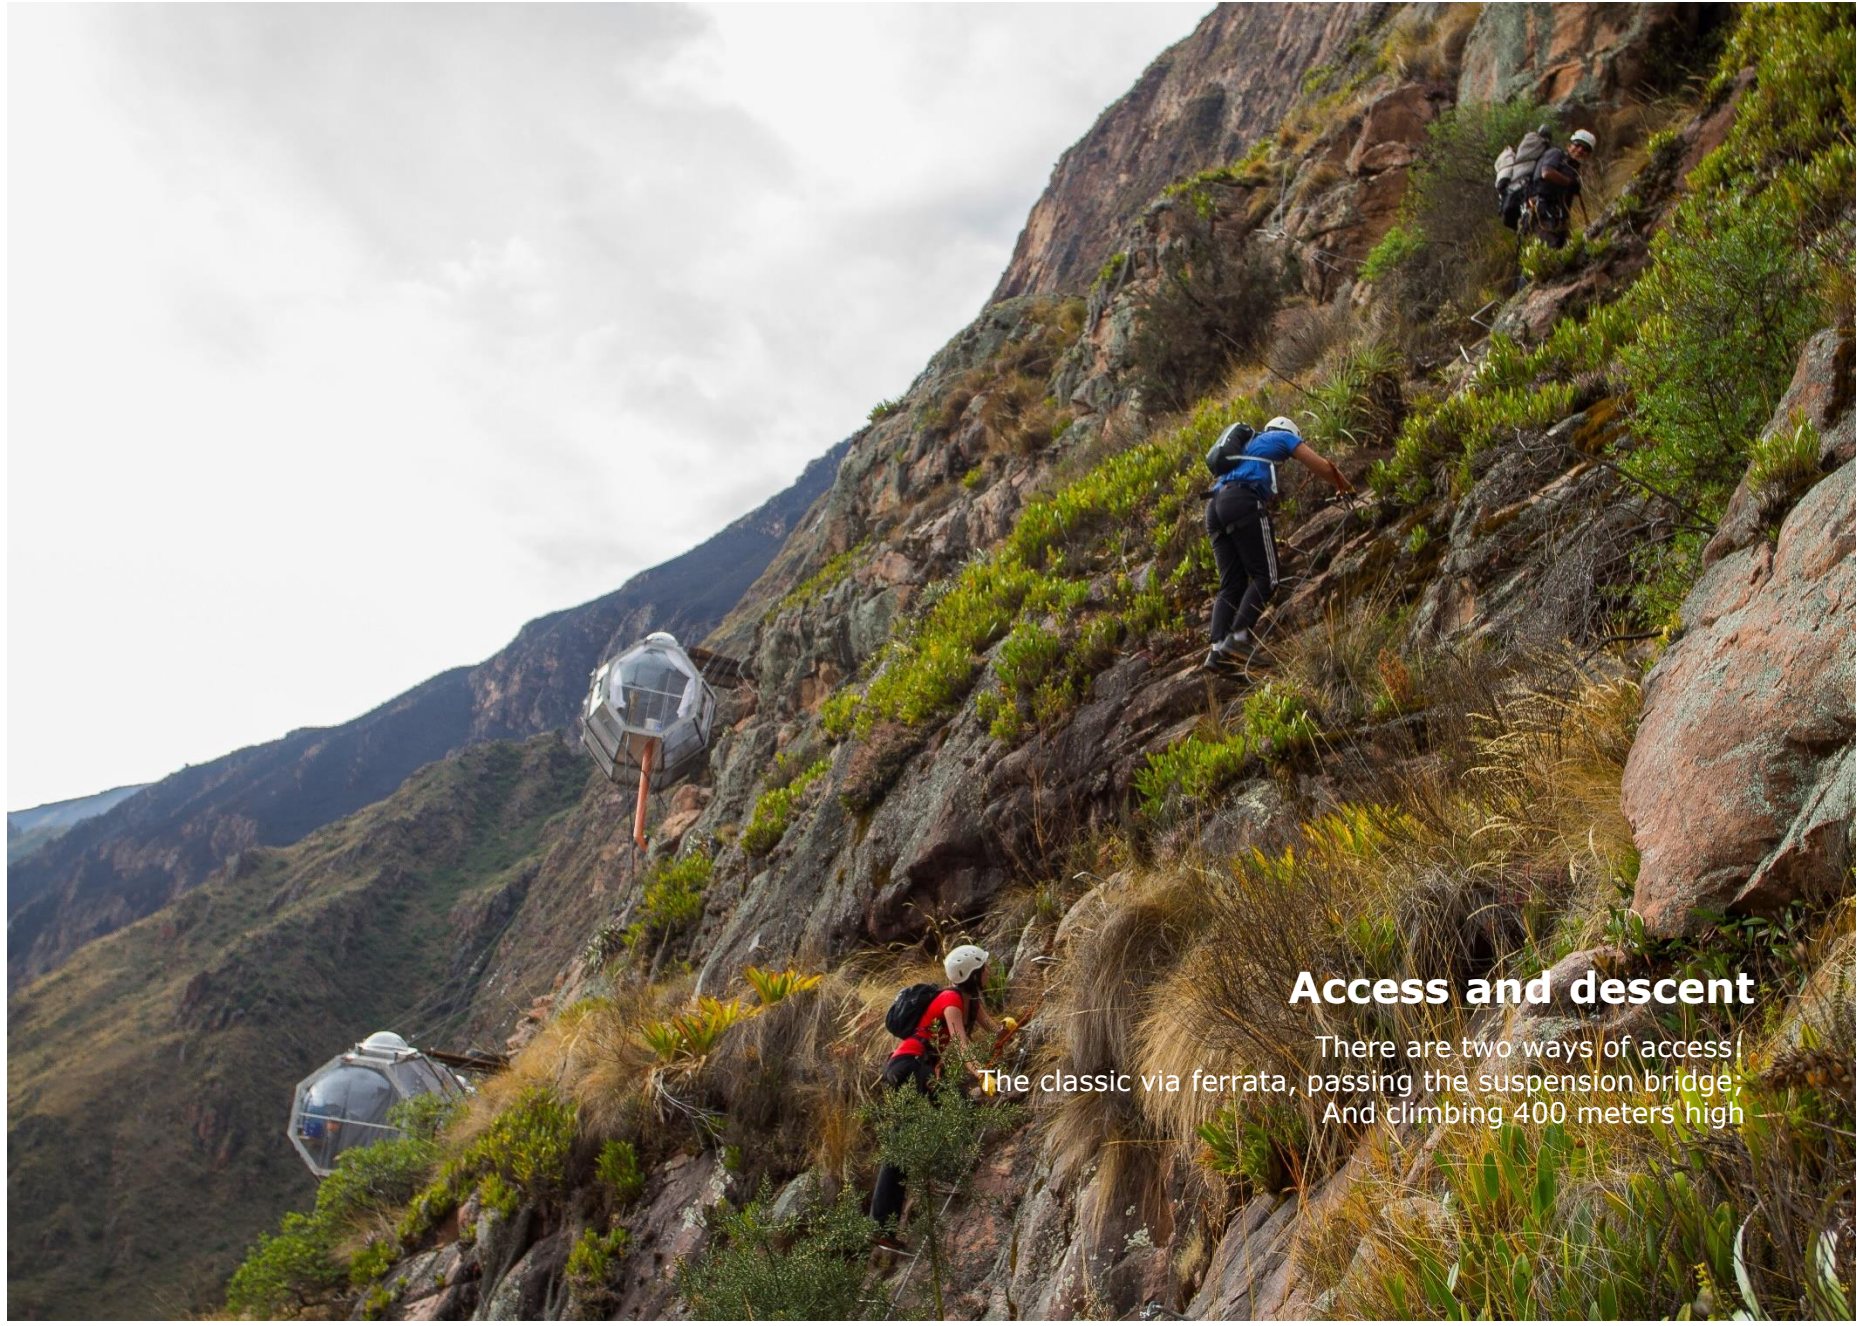

Private
bathroom

Material:
Aero-space aluminum and high-strength polycarbonate.

Dimensions:
7.5 mt. Long x 2,60 mt. High and wide

Access and descent

There are two ways of access |
The classic via ferrata, passing the suspension bridge;
And climbing 400 meters high

Or by the intrepid path of the zipline and its first line.

After a night in Skylodge, the descent is made by a 100 mt rappel, completing thus the activity of via ferrata or the 5 lines that complete the adventure of the zipline.

Once inside the module, the person can remove the harness, since the only way out is through the exit hatch located at the top of the module.

There are six windows and four ventilation ducts in the module that ensures a proper atmosphere.

The lighting in each module is entirely ecological, thanks to photovoltaic panels that allow to store energy in batteries to feed 4 lamps inside the module.

Each module has a private bathroom, divided from the rest of the module with the help of a noise insulation wall. Inside you will find a toilet or dry toilet, a potty and a hand wash.

Taking advantage of a wonderful view through a dome of 1.8 meters in diameter. This dome has curtains in case you want more privacy with the condors (possible neighbors).
